

Keathley Landscaping Expands Professional Sod Grass Installation Services Across North Texas

August 24, 2026

GARLAND, TX - August 24, 2026 -

Keathley Landscaping, a full-service landscaping company operating since 2002, has expanded its professional sod installation offerings to meet rising demand from homeowners seeking to replace damaged or bare lawns throughout the North Texas region. The company reports that most residential projects can be completed within one to three days, depending on property size.

The expansion reflects a growing interest among area residents in fast lawn transformation as an alternative to seeding from scratch. Sod installation allows homeowners to move from bare dirt to an established lawn in a matter of days rather than the weeks or months required for traditional seeding methods. The company provides sod service to communities including Wylie, Lavon, Plano, Garland, and surrounding areas.

Keathley Landscaping works with several grass varieties to match local soil and light conditions, including St. Augustine, Zoysia, Bermuda, and Tall Fescue. The installation process begins with removing existing plants and preparing the soil, followed by addressing underlying issues such as pests, drainage problems, or weeds

before the new turf is laid.

"Sod installation is about far more than laying down grass," said Logan Keathley, owner of Keathley Landscaping. "Soil preparation and proper grass selection determine whether a lawn thrives or struggles. The goal is to give homeowners a lawn that establishes quickly and holds up over time, which is why each project starts with an assessment of the site conditions."

The company notes that a well-maintained lawn contributes both to the appearance of a property and to its overall value. As part of the expanded sod service Wylie residents and neighboring homeowners can access, Keathley Landscaping evaluates each yard before recommending a grass type and installation approach suited to the specific location.

Beyond turf work, Keathley Landscaping addresses drainage challenges that often affect lawn health. Logan Keathley holds certification as an NDS Certified Drainage Contractor, allowing the company to combine sod installation with solutions for standing water and poor grading. Options range from French drains and regrading to custom-designed buried drainage systems.

"Drainage and lawn health go hand in hand," Keathley added. "A new lawn will not last if water pools in the yard or the grading works against it. Solving those underlying problems first is part of doing the job properly."

Interest in Keathley Landscaping sod work has grown alongside the company's broader landscaping portfolio, which includes landscape design and construction, patios, decks, pergolas, fences, stonework, flowerbeds, and lawn care and maintenance. This range allows the company to handle both standalone sod projects and larger outdoor renovations.

Keathley Landscaping is a full-service landscaping company based in the Dallas, Texas area, in operation since 2002. The company provides landscape design and construction, hardscape installation, drainage solutions, sod installation, and lawn care and maintenance to Dallas, Garland, Wylie, Plano, and surrounding communities. Its work emphasizes site-specific planning, soil preparation, and long-term lawn health across residential properties in the region.
